

DESERT COMBAT - M1009

APPLICATION

Desert Combat™ gloves are specifically designed for dry and warm climate. A very popular amongst air and land troops in Afghanistan and Iraq. Composition of long hair sheep skin with meta-aramids fibres in Nomex® gives excellent dexterity and unique grip. Gloves provide protection against blade cut, puncture, abrasion and fire. Many years of experience and advanced technology contributes to “your second skin” gloves which weight only 60 grams.

SPECIFICATION

The gloves M1009 are made in accordance with Directive 89/689/EC and satisfy the following norms: PN-EN 420:2005 (General requirements for gloves) PN-EN 407:2007 (Protective gloves against thermal risk - heat and/or fire) PN-EN 388:2006 (Protective gloves against mechanical risk). The gloves does not consist of any allergic components.

MATERIALS

Upper part: Nomex® - Protection against heat and mechanical risks
