

## Wash instructions – Granqvists® Firefighting Leather Gloves

### GENERAL

Use slow and gentle program in 40°C.

### DETERGENT (Recommended)

- Ecobright Detergent M

Ecolab AB  
Götalandsvägen 230  
125 45 Älvsjö  
Phone: +46851989623  
Mail Customer service: [order.se@ecolab.com](mailto:order.se@ecolab.com)

### SOFTENER (Recommended)

- Lival Licker KNZ

Tvätt & Textil System AB  
Address: Ytterbyvägen 18, 192 76 Sollentuna  
Phone: 08-626 82 90

### WASHING PROCEDURE

1. Put gloves into machine. Note the maximum weight of the machine and calculate that 1 pair weights ca 400gram.
2. Apply Detergent M in the tray for main-wash. Usually this is marked with II. 3ml/kg. Most important is low alkaline value.  
Example: 2kg of gloves = 6ml detergent
3. Apply Lival licker® in the tray for softener. 15-30ml/kg
4. Turn the machine on and set delicate-wash.  
This program is gentler to the leather thanks to less mechanical abrasion on the gloves. The gloves are cleaned thanks to the detergent and temperature.
5. Start the machine
6. Remove the gloves from the machine.
- (7). If possible, add some uncoloured leather wax to the gloves whilst they are wet. This adds dexterity and water repellence.
8. Dry the gloves in a drying-cabinet 60°C for 240 minutes or in a warm-room over longer time. DO NOT TUMBLE DRY.
